Read the following passage and then choose the correct answer from a, b, c or d:

Deep within the heart of the Amazon rainforest, a team of biologists made a remarkable discovery. They found that trees communicate through underground networks of fungi called mycorrhizae. These fungi act as natural messengers, transferring nutrients and chemical signals between plants. When a tree is under attack by insects or disease, it releases distress signals through its roots. Nearby trees, sensing the warning, begin producing protective chemicals even before the danger reaches them. This incredible process, known as the 'Wood Wide Web,' reveals that forests are not silent—they are full of quiet conversations beneath the soil.

Scientists discovered that stronger trees sometimes share nutrients with younger or shaded trees, ensuring their survival and maintaining balance. This natural cooperation challenges the traditional belief that plants compete for resources; instead, they form a vast, interdependent community. Through advanced sensors and data modeling, researchers confirmed that these exchanges happen continuously, especially in times of stress. The discovery has inspired innovations in environmental science and biotechnology, as engineers explore ways to mimic this system in sustainable farming and data networks.

It also deepens our understanding of how ecosystems sustain themselves and how fragile they become when disrupted. Every tree, leaf, and drop of rain contributes to a living orchestra that keeps the planet alive. The forest, therefore, is not merely a group of trees—it is a dynamic network of life built on cooperation, balance, and resilience. By protecting forests, humanity protects its own source of air, water, and inspiration, ensuring that this hidden symphony continues to play for generations to come.

12. The suitable title of this passage is "……………….".

a) The secret communication network of trees
b) Trees competition in forests
c) The role of fungi in ecosystems
d) How scientists study forests

13. What detail best helps the reader understand how trees communicate?

a) Trees grow faster to compete for sunlight.
b) Trees send chemical alerts through their roots.
c) Trees release signals when they feel the cold weather
d) Trees release signals when their leaves fall.

14. The sentence that summarizes the last paragraph is "……………….".

a) Forests are complex ecosystems where trees share signals and resources
b) Scientists study trees because they are beautiful
c) The Amazon forest is larger than any other rainforest
d) Mycorrhizae are dangerous to plant health

15. Scientists use data to study the forest network as they………………….

a) use satellites to count tree populations
b) apply sensors and modeling to confirm exchanges
c) record animal sounds in the forest
d) measure rainfall in different seasons

16. We can infer about the relationship between trees that they…….

a) compete for nutrients and water only
b) live without depending on their roots
c) grow faster when isolated from others
d) cooperate to survive and protect each other

17. Trees' underground network is similar to human communication systems as both……………

a) use signals to share information efficiently
b) need sunlight to function properly
c) transmit data mainly through sound and vibration
d) stop functioning when natural light disappears

18. The author suggests that the feelings or intentions behind the trees' actions ……

a) compete for power and domination
b) act as a community focused on balance and care
c) ignore the weaker members of their kind
d) survive by avoiding cooperation

19. If people continue destroying forests, ………………

a) the balance of natural life will be severely damaged
b) new fungi will appear and restore the ecosystem
c) forests will regrow faster and stronger
d) humans will no longer depend on trees for air survival

Read the following passage and then choose the correct answer from a, b, c or d:

Ethan had always taken pride in his creative work at a design company. But when a major project unexpectedly failed, he lost his job and confidence. The sudden change left him anxious and uncertain about his future. Each day felt heavier than the one before, and he often questioned whether his life still had meaning. His world, once full of color and purpose, now seemed gray and empty.

One morning, during a quiet walk by the river, Ethan noticed the old iron bridge from his childhood. Once bright and strong, it now stood dull, cracked, and forgotten. Its broken boards seemed to reflect his own sense of loss and disappointment. This simple observation sparked an idea: if the bridge could be repaired, maybe his spirit could be restored as well.

He began cleaning it, removing graffiti, brushing off rust, and replacing worn planks. The work was slow but deeply healing. As the days passed, people from the neighborhood stopped to watch, then started helping. Together they painted the bridge in cheerful colors and added kind messages about hope and renewal.

The transformation became a story of cause and effect—Ethan's loss had created a new beginning. The bridge no longer connected only two sides of the river; it connected people. When the work was finally complete, Ethan looked across the bright rails and smiled. He realized that rebuilding the bridge had rebuilt him too. His journey from despair to gratitude showed that broken things, like broken hearts, can always be repaired through patience, teamwork, and faith in new beginnings.

20. The main idea of the passage is "……………………".

a) A neglected bridge is repaired by the community after years of decay

b) A worker loses hope after his company closes and gives up entirely

c) A designer starts a new career in another country to forget the past

d) A man's personal loss inspires him to rebuild both a bridge and his life

21. Ethan was inspired to repair the bridge because of his………………....

a) desire to earn money and impress his old employer

b) memories of crossing the bridge as a child long ago

c) plan to design a modern bridge for the town mayor

d) wish to destroy the old bridge and build a new one

22. The sentence that summarizes the second paragraph is that Ethan …………

a) saw the broken bridge as a reflection of his own life and began restoring it

b) hesitated at the bridge, unsure if he could restore it

c) wondered if repairing the bridge could improve his mood

d) noticed the bridge’s cracks and worn boards but considered leaving it as it was

23. The main event in the passage is developed through ……………….

a) official reports and documents about city planning
b) quick actions and unrelated events about other people
c) clear stages showing teamwork, hope, and personal growth
d) short notes without reasons, results, or connections

24. The reader can infer that Ethan will ………………………....

a) continue supporting projects that bring people together in his town
b) forget about the bridge once he finds another well-paid job
c) leave the neighborhood to start a company in a distant city
d) stop working on community projects because of his past failure

25. The tone of the passage is ……….....

a) indifferent, describing events without emotion
b) angry, warning readers not to trust others
c) critical, focusing only on Ethan’s personal failure
d) inspiring, showing that healing grows from kindness

26.Ethan's transformation during his crisis is…………

a) lazy and bored but later lonely and silent
b) rich and successful but later tired and forgotten
c) hopeless and lost but later strong and connected
d) calm and free but later angry and impatient

27. Ethan’s feelings …………………………....

a) changed from despair and doubt to hope and gratitude
b) remained fearful and hopeless throughout his experience
c) turned bitter toward others who tried to help him
d) became confused and uncertain even after rebuilding the bridge
